

Executive Dashboard

**Best-in-class
Manufacturers
know!**

**Lean itself is
not enough...**

It's not just lean
It's
Lean and Enabled

ProMan's graphical
application suite is
married to a web based
dashboard taking the
pulse of the business

Measure your Metrics

A recent published study by the Aberdeen Group shows that 'Best-in-Class' companies all measure the following business metrics, or KPI's (Key Performance Indicators) to keep their Lean initiative on track:

**“On Time Delivery, Throughput,
WIP and Reductions in
Manufacturing Cycle Times”**

It is critical to lean initiatives that:

**“Factory floor data is delivered as
actionable intelligence to Lean
scheduling and execution decision-
makers”**

Executive Dashboard

- Web-Based Performance Management Software
- A tool for Data Management and Performance Metrics
- Trending for Business process refinement
- Aligns Strategies and Goals
- A key element Continuous improvement cycles
- Drill to the details
- Automatically refreshed

Continuous improvement depends on analysis

EXECUTIVE DASHBOARD allows analysis of the plan which is necessary to validate and allow for Continuous improvement

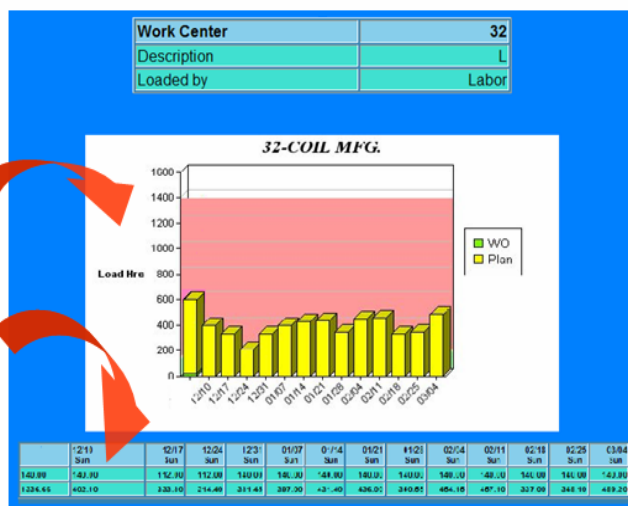

Analysis:
Sales Management

Allows management instant views of order bookings and other important metrics

Analysis: Operations Management

Web based dashboard allows management instant views of operational capacity plan by work center

Each day data from ProMan is uploaded, summarized and loaded into fifty industry standard metric categories. Some of which may apply to your business and some may not. We allow you to identify the ones that do and these are the ones that will appear in your executive dashboard for you to use to feel the pulse of the organization.

Both graphical and numeric displays
